SUPPLEMENT TO REPORT NO.

44

1. A large cement works is under construction under the Five Year Plan northwest of Hranice (P50/025) in Moravia. The building site is located about 1.5 miles from the center of town. The cement works may be one of the largest enterprises of this kind in Czechoslovakia.* Frequently school and military brigades are seen working on the surface construction in addition to the regular employees. Limestone for the production of cement will be quarried in the nearby hills, which consist mainly of limestone.
2. During 1951 a special technical school for the cement industry was established in Hranice. This school is unique in Czech public education.
3. The gas pipe-line under construction between Moravska Ostrava (P50/059) and Brno (P50/W40) was finished as far as Hranice in June 1951. The pipe-line will go through Prerov (P50/003) on the way to Brno. The pipe-line is being laid about 2 meters under the surface and consists of cast-iron pipes about 70 cm. (sic) in diameter. The digging, partly manual and partly mechanical, is proceeding very slowly

25X1A

* [redacted] reports that another cement plant under construction will be the largest in Czechoslovakia.
